

**CASE STUDY**

Six Flags Theme Parks

**Challenge:**

Six Flags Theme Parks needed updated units to be used for Character Meet and Greets within their theme parks. With locations scattered throughout multiple states, our national status was vital to the success of this project. The Meet and Greet booths needed to blend with the style of the park and the old time western theme of existing units, along with meeting several other specifications.

Solution:

Each Meet and Greet unit had painted lap siding exterior, a residential entry door, an 8' wide roll up canister door, and an 8'x4' service window. We also installed custom built cabinetry in the interior including countertops, interior lighting and paint, along with drywall finish, and interior outlets with (3) 20-amp breaker boxes. Units were built at the Tuff Shed location nearest the park for rapid onsite delivery and installation.
